

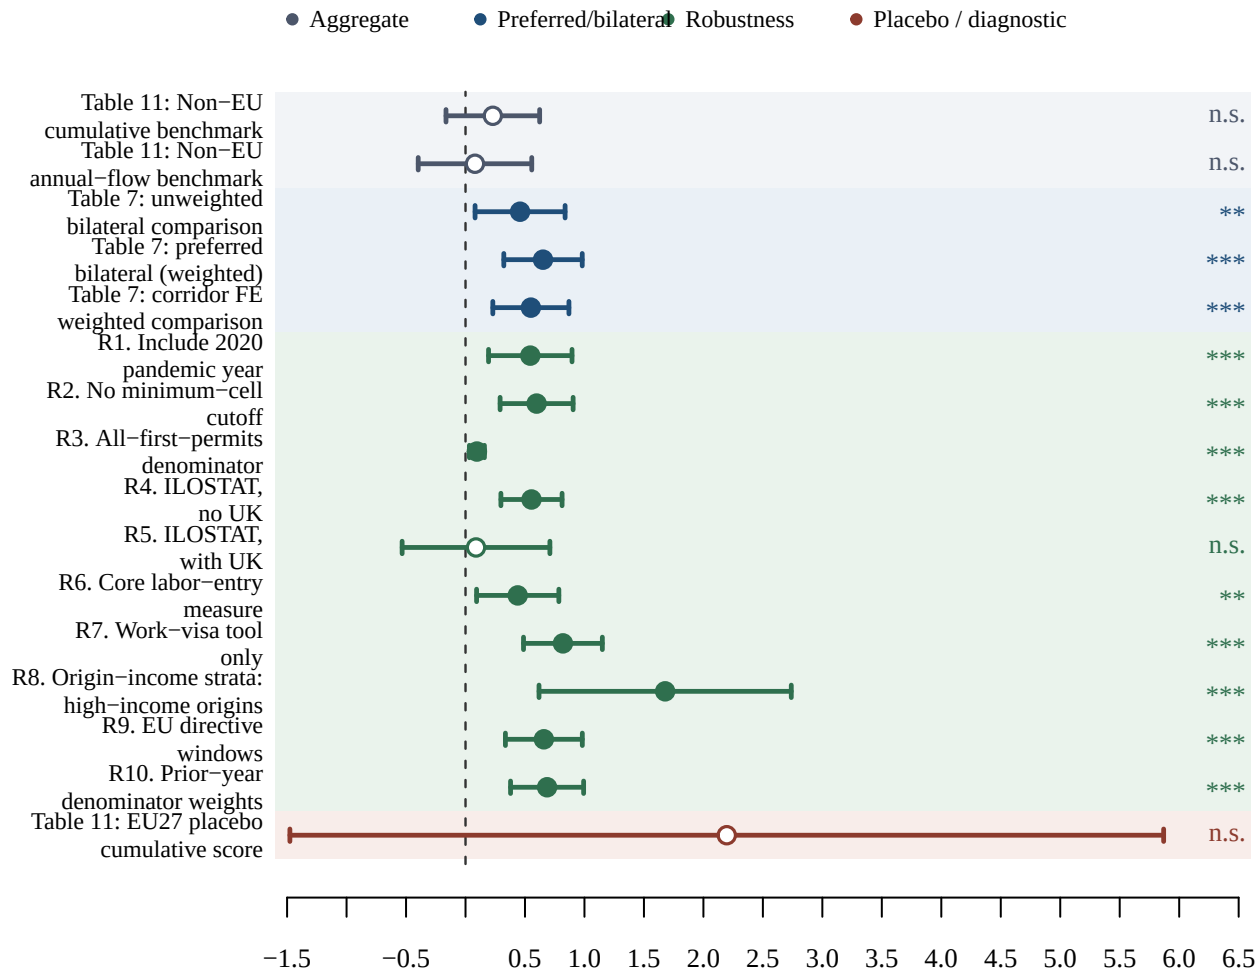

Graph 2. Coefficients across main, robustness, and placebo specifications

Coefficient on policy-change measure, in percentage points of high-skilled share per one-unit policy change

95% CIs from reported SEs; filled dots: $p < 0.05$. Robustness: Table 10; aggregate/placebo: Table 11.

R8 reports the high-income-origin stratum only; R11 leave-one-destination-out is omitted because Table 10 reports a coefficient range.
