

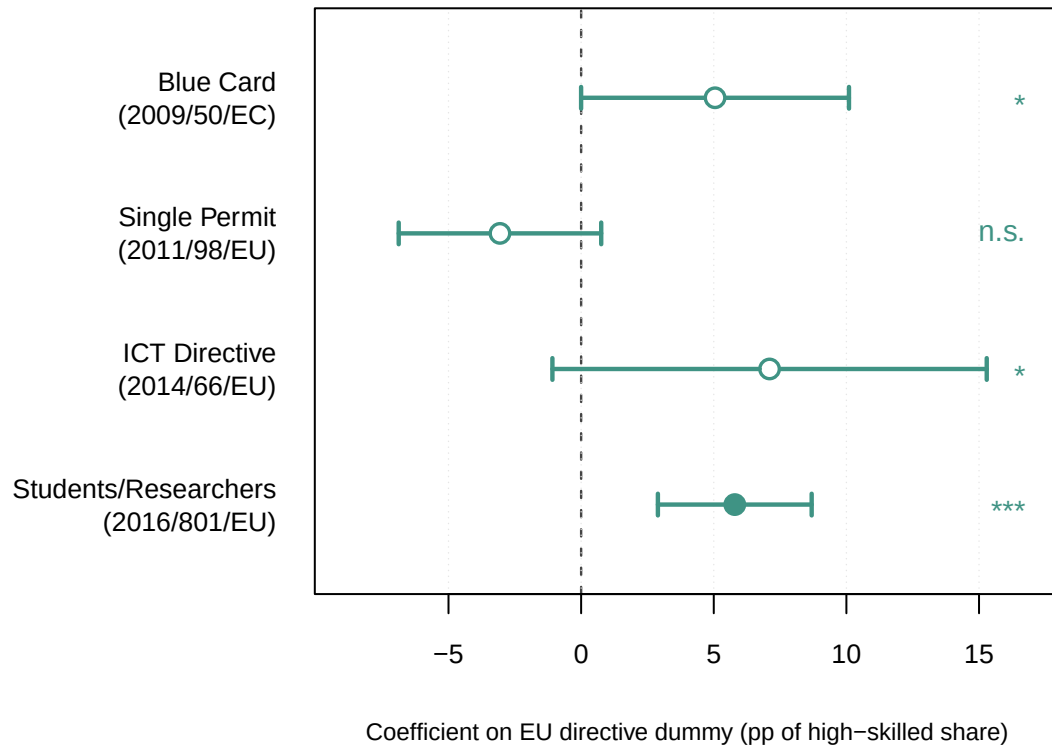

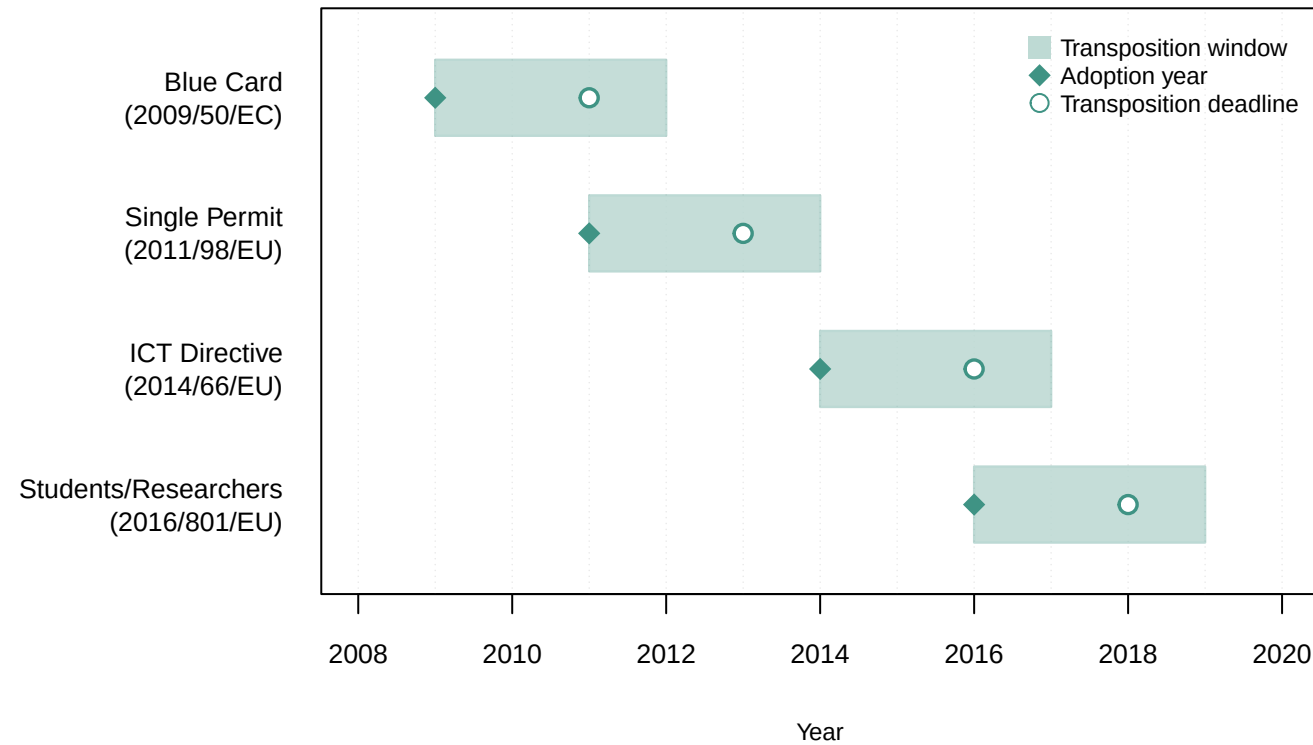

Graph 3. EU labor-migration directives in the panel window

Panel A. Estimated EU directive coefficients from the preferred bilateral specification

Panel B. EU directive adoption (diamond) and transposition window (bar), 2008–2020

Panel A reports directive dummy coefficients from Robustness 9c. Bars are 95% confidence intervals from clustered SEs; filled dots indicate $p < 0.05$; stars: *** $p < 0.01$, ** $p < 0.05$, * $p < 0.10$.

Panel B shows adoption years and transposition windows. Cells are treated when the destination is an EU member state and the calendar year falls inside the directive window.
